

Narongsak Buangam

Industrial Systems & Technical Operations Specialist I pakiyhm@gmail.com I Bangkok / Pattaya, Thailand

Results-driven Systems Integration & Technical Operations Specialist experienced in bridging hardware infrastructure, enterprise networks, and automated workflows. Proven track record in executing field deployments, managing multi-tier system integration, and delivering reliable business continuity solutions.

Experiences

NTT DATA (Working onsite at Brembo Thailand) - Rayong

IT Infrastructure & Automation Engineer I 2026

- Resolved plant IT/OT incidents across L1-L3 systems, isolating network faults, switch loops, and hardware issues to sustain 24/7 manufacturing operations.
- Diagnosed critical industrial network failures (Ping/Tracert/LAN diagnostics) and liaised with global engineering teams (India/ Italy) on root causes.
- Mitigated cloud scanning outages by deploying segregated Scan-to-SMB storage failover routes, ensuring uninterrupted production workflow.
- Enforced security compliance via air-gapped cellular SIM gateways for external BOI/CCTV access, preventing unauthorized core LAN intrusion.

Toyota Tsusho Systems (TTST) - Bangkok

Global IT Monitoring & Helpdesk Engineer I 2024 - 2025

- Managed enterprise incidents across global teams.
- Worked within SLA-driven environments requiring structured problem solving, escalation and cross-functional communication.
- Developed automated email reporting and data parsing tools for global infrastructure monitoring.

CPF (Charoen Pokkaphan Food) - Central region

Management Trainee I 2024

- Improved production processes through Excel automation, data analytics and bot development.
- Analyzed operational processes and identified opportunities for automation.
- Worked with business and production users to translate operational problems into digital solutions.

Key Technical Projects

Production-Ready IoT & Enterprise Systems

Quiet Health: Non-intrusive bedside monitor using ESP32-C6, mmWave radar, and thermal camera; streams telemetry via MQTT to Cloudflare Workers with automated LINE anomaly alerts.

YOODEE POS: Local-first offline-ready POS built with React, Vite, and IndexedDB; features resilient Google Drive backup sync and automated inventory threshold webhooks.

IT-AMS (localIT): Zero-bloat IT asset tracker built with PHP/MySQL; integrates 2D barcode search, equipment handover verification workflows, and audit-ready data export.

Education

Ubon Ratchathani University I 2024

Bachelor of Science — Information & Communication Technology (GPA: 3.71)

Detudom Technical College I 2020

High Vocational Certificate — Business Computer (GPA: 3.97)

Certifications & Courses

Microsoft Power Platform Fundamentals

Microsoft / Coursera, 2026

Technical Support Fundamentals

Google, 2026

Digital Marketing & Analytics

RealSmart Academy × depa, 2025

Achievements

Student Royal Award — **2020**

1st Place — **Research to Market (R2M) — 2023**

2nd Place — **Thailand Innovator Award — 2019**

2nd Place — **Web Designer — 2018**

Skills & Tech Stacks

Industrial IT & OT Systems

Kepware IoT Gateway (OPC UA / Modbus), Metrology Data Sync (Zeiss CMM to QDAS/IQS), Plant Telemetry, Industrial LAN

Enterprise Mobility & Cloud MDM

Microsoft Intune (Endpoint Management), Samsung Knox Mobile Enrollment (KME), Azure / Entra ID, Zero-Touch Provisioning

Infrastructure & Systems

Active Directory (AD/GPO), SMB Storage Architecture, Network Diagnostics (TCP/IP, Switch Logs), Air-Gapped Gateways

Automation & Integration

Power Automate, n8n, REST APIs, Webhooks, Python, SQL, ERP Interoperability (Dynamics AX 2012 / M365)
