

Narongsak Buangam

IT Solutions & Business Systems Support Engineer

pakiyhm@gmail.com | 063-496-9565 | pakiyhm.github.io | Rayong / Bangkok, TH

IT engineer with 2 years in manufacturing and global IT. Provides user-level support for business applications, handles incidents and root-cause analysis with teams in India, Italy and China, coordinates vendors, and builds AI-assisted automation (n8n, Power Automate, Python). Calm, structured problem solver who adapts plans to real situations. Seeking growth in supply chain and digital transformation.

Experience

NTT DATA (onsite at Brembo Thailand) - Rayong
IT Infrastructure & Automation Engineer | Feb 2026 - Present

- Provide user-level business-application support in manufacturing and warehouse: ERP access and report export (Dynamics AX 2012), barcode and label printing, e-Tax invoice export, and Business Central rollout prep.
- Resolve L1-L3 incidents with root-cause analysis (switch logs, LAN faults, AD/GPO, ERP access) and escalate to teams in India, Italy and China.
- Coordinate vendors and procurement: selected the vendor and deployed 10+ Teams IP / wireless phones and an IVR; RFQs for Adobe and AutoCAD; worked with Dell, Fluke and Samsung dealers.
- Replaced email-based scanning with SMB per security standards and built Scan-to-SMB failover routes for cloud-scan outages, keeping production documents flowing.
- Assessed exposure after a public security advisory: checked a vendor system's version via browser network inspection, escalated to management and followed up with the vendor for an update.
- Run zero-touch enrollment (Intune, Samsung Knox KME) for 20 phones and 3 industrial tablets; manage ~30 laptops and ~20 meeting-room / signage devices.
- Integrated Zeiss CMM data into IQS/QDAS quality systems; supported an energy-monitoring project (live logging of 37 tags).
- Isolated external CCTV through a cellular SIM gateway separate from the plant LAN; installed server-room environmental sensors.

Toyota Tsusho Systems (TTST) - Bangkok
Global IT Monitoring & Helpdesk Engineer | 2024 - 2025

- Handled SLA-driven incidents for global teams with structured escalation.
- Developed automated email reporting and data-parsing tools for monitoring.

CPF (Charoen Pokphand Foods) - Central region
Management Trainee | 2024

- Improved production processes with Excel automation, analytics and bots.
- Turned production users' problems into digital solutions.

Key Technical Projects

IT-AMS: PHP/MySQL IT asset tracker with 2D barcode search and handover workflow. Retired from internal use, reverted to Excel as a security precaution.

YOODEE POS: offline-first POS (React, Vite, IndexedDB) with Google Drive backup and inventory webhooks.

Quiet Health: ESP32-C6 bedside-monitor prototype with MQTT to Cloudflare Workers.

Skills & Tech Stacks

Business Applications & ERP
Dynamics AX 2012 (user support), Business Central (rollout prep), QDAS/IQS

IT Service Management
Incidents, SLA, escalation, root-cause analysis, vendors

Automation & AI
n8n, Power Automate, Python, SQL, Excel; LLM APIs, AI CLI agents, AI apps

Devices & Identity
Intune, Knox KME, Entra ID, AD/GPO, SMB

IoT & Embedded
ESP32, MQTT, Modbus

Education

Ubon Ratchathani University | 2024
B.Sc. in ICT (GPA 3.71)

Detudom Technical College | 2020
High Vocational Certificate, Business Computer (GPA 3.97)

Achievements

Student Royal Award - 2020

1st Place Research to Market (R2M) - 2023

1st Place National RRR Award - 2019

2nd Place Thailand Innovator Award - 2019

Certifications

Power Platform Fundamentals
Microsoft / Coursera | Aug 2026

Technical Support Fundamentals
Google | Jul 2026
